

Amendments to the Specification

Please amend the specification at page 13 lines 21 - 31 as follows:

Turning to Fig. 6, there is illustrated a print preview version [[600]] 610 of a web page [[610]] 600 in accordance with an aspect of the subject invention. The preview version [[600]] 610 includes one or more visual and/or textual references to various sections of the page that have been identified by a parsing component, for example. In particular, the identified sections are “AD” which refers to advertisement and “NAV” which refers to page navigation. The visual or textual references can appear in a block style as shown and substantially cover the underlying content or can be transparently superimposed over the content. In the latter case, the content, in addition to the visual or textual reference, can still be viewed by the user. The visual and/or textual references assist the user to readily identify content on the page to make it easier to determine which sections of the page should be printed.
